Position: Financial Analyst

DWPF

What do we do?

DWPF is an established infrastructure finance advisory firm, with a market leading financial modelling team. We specialise in building financial models and arranging finance for a variety of infrastructure projects ranging from schools and university accommodation to wind farms and energy-from-waste. We are proud to have provided innovative and independent advice to clients for over 20 years, during which we have advised on over 130 completed transactions and raised over £6bn of financing.

What are we looking for?

DWPF is looking for talented and hard-working graduates with strong numerical and analytical skills, and an interest in developing a grounding in financial modelling. We offer in-house training, support in studying for CFA or ACA, and as a small, dynamic company we have a flat structure that will give you the opportunity to gain valuable experience on live deals from early on in your career.

Key details

Job Title: Financial Analyst

Job Type: Permanent; full-time

Location: City of London

Starting Salary: Competitive + opportunity for CFA/ACA

Start Date: Flexible

Requirements

- Minimum 2.1 from a top university in a science, engineering or maths-based degree
- An interest in financial modelling and developing knowledge and experience of Microsoft Excel
- Strong written and analytical skills, with an aptitude for problem solving
- Excellent attention to detail
- Ability to work and communicate as part of a team

What will the role involve?

You will be building, tailoring and reviewing financial models for project and infrastructure finance. This work underpins our financial advisory, bespoke model build and model review services. Financial models will be developed in Microsoft Excel and used to forecast cash flows, balance sheets and profit and loss statements. Based on your skills, aptitudes and abilities there will be genuine opportunities to progress and develop in the role.

We offer a diverse, welcoming and supportive working environment. Upon completion of our in-house training programme, employees benefit from the immediate on the job experience that comes with working for a small, dynamic company.

DWPF

Training opportunities

DWPF will provide the opportunity to develop an extensive knowledge of financial modelling working on live projects, whilst also supporting you to study for the respected ACA or CFA qualifications, meeting the costs and providing study leave, including the opportunity to attend classroom courses with a professional trainer. DWPF is an ICAEW (Institute of Chartered Accountants in England and Wales) registered trainer.

How to apply

Please send an updated CV and cover letter to info@dwpf.com

DWPF at a glance

Financial advisory

Providing financial advice on a range of infrastructure projects, primarily the structuring and arrangement of finance for new projects or the restructuring of operational projects

Financial model development

Building bespoke financial models for infrastructure transactions, operational projects and to support our advisory practice

Financial model audit

Providing assurance for stakeholders (e.g. lenders) through 3rd party independent review of financial models

Training

Utilising our vast experience developing financial models to provide financial modelling training solutions to other institutions and individuals

Catherine Wu - Financial Analyst

University: UCL

Degree: MSc Infrastructure Investment and Finance

Joined: April 2018

"Since joining DWPF I've had the chance to work on multiple infrastructure projects across different sectors and stages of a project's lifecycle, including a bid for a student accommodation project, the refinancing of a street-lighting project, solar farm valuations, an operating model for a biomass plant, and so much more! In addition to all the hands-on experience, I've been able to enjoy a work life balance while learning financial modelling in a structured way, finishing my CFA studies, and receiving support and advice from the team. DWPF is a good place to start your career in project finance."
