DWPF

About DWPF

DWPF is an established financial advisory firm supported by a market leading financial modelling team. As such, we specialise in structuring and arranging project and infrastructure finance.

We are proud to have provided innovative and independent advice to clients for over 15 years, during which we have advised on over 120 completed transactions to date and raised over £5bn of financing in the process.

Our clients include FTSE listed companies, private developers, investment funds and other financial investors. In addition to these, we work with public sector counterparties such as local authorities and universities.

Underpinning our success is an innovative approach to providing financial solutions. As one of the industry's foremost financial advisory companies, we believe in building long-term partnerships with our clients so we can better understand their needs and requirements. Our professional team of advisors and modellers are committed to projects from initial appointment through to financial close and beyond.

For more information please explore our website (www.dwpf.com).

Job Description

You will be part of the Financial Modelling team developing, tailoring and reviewing financial models using Microsoft Excel to forecast cash flows, balance sheets and profit and loss statements. Based on your skills, aptitudes and abilities there will be genuine opportunities to progress and develop the role.

The role will require the individual to build detailed financial models for various uses but with the key focus being infrastructure project finance. The successful candidates will be involved in all phases of the bid process and the financial structuring of projects across all sectors within infrastructure finance.

As a small professional company all members of the team are utilised to help support all of the company's operations and an open-plan/flat structure operates to assist individual development. The successful candidate(s) will benefit from the immediate on the job experience (after completing the in-house training programme) that comes with working for a small dynamic company, and will develop financial modelling skills which are sure to be of real value to those pursuing a career in finance.

Requirements

*	A 2.1 from a top university in a science, engineering or maths based degree

*	A good working knowledge of Microsoft Excel

*	Strong written and analytical skills

*	Excellent attention to detail

*	The ability to work and communicate as part of a team

Training

DWPF will provide the opportunity to develop an extensive knowledge of financial modelling, whilst also supporting you to study for your ACA or CFA qualification, meeting the costs and providing study leave to attend classroom courses with a professional training provider.

Please apply by sending a CV and cover letter to info@dwpf.com.
